MINING, BUSINESS AND STOCKS

M'VICHIE. DIDN'T WANT TO ADMIT IT

General Manager of Bingham Con. Evasive as to Facts Concerning Deal With American.

BUT WOULD NOT MAKE DENIAL

Says However, That Arrangement to Exchange Ores Will Continue Which Amounts to a Confirmation.

Captain Duncan McVichie, general manager of the Bingham Consolidated properties, returned from his eastern trip last night. Asked concerning the deal between his corporation and the American Smelting & Refining company, by which the Bingham Con. agrees to keep out of the lead smelting business an dthe American, in return, agrees to give over to the Bingham the handling of a certain portion of its copper ores, the captain was non-committal. He declared he had nothing to say at this time. However, he was unwilling to confirm or deny the reports emanating from Boston to the effect that a deal had been consummated. Evidently he preferred to let the American management do the talking.

"We have been on friendly terms with the American," the captain ventured to say, "and we have been ex-changing ores for nearly two years. Whenever the American has had a shortage of certain classes of ores, we have gone to their assistance when we were not short on that particular kind of ore ourselves. On the other hand, the American has helped the Bingham Con. in the same way.

"This exchange has been going on, as I have said, for some time, and I hope

to continue it."
Captain McVichie declared that his company has no intention of making any enlargements of its present smelt-ing facilities. The fact is, it already has capacity for the treatment of 5,000 tons per month more than it is now do-ing. No enlargements will be made at least until this capacity is exhausted. He hoped to get along with the present

equipment and make some money be fore giving consideration to paying out any more for construction. A new sampling mill, however, is one of the necessities which compels expenditure in that direction. The present sampling facilities are inadequate to meet demands, so a new one will be

FORENOON ON 'CHANGE. Daly-West Slightly Stronger - The Closing Quotations.

constructed at an early day.

This was another dull day for the brokers and the total stocks sold on the Mining Exchange, 8,200 shares, only

Mining Exchange, 8,200 shares, only brought \$3,309.25.

Daly-West, while recording only one sale, closed somewhat stronger, the quotation being at \$25.75. Star Condisplayed some activity, but the stock ended lower. The discord between certain shareholders is having the effect of frightening some holders to the point of selling. Uncl. Sam Con. was of selling. Uncle Sam Con, was called for and supplied from 20 up to 21 cents. For Con. Mercur 52 cents was bid, with no stock offered. Montana-Tonopah was strong in the bidding; \$1.50 was bid, but \$1.70 was the lowest

TREATMENT OF ZINC ORES.

The Blake-Marscher Static Process May

Be Installed at Park City. The increasing demand for zinc is causing the strictest investigation of the western mining fields for desirable ores, says the Mining Reporter. Properly speaking, there are no districts in the Rocky mountains which may be considered as containing zinc mines. There are, however, a large number of districts which have mines in which zinc is a prominent mineral and in many such cases it is considered as "re-The undesirable sinc minerals are now a considerable source of For instance, at Leadville and The success of the zinc business in

sistent search to be made in order to find processes to treat similar ores. The magnetic separating process bids fair to solve many of the problems now before the western miners.

Recently the zinc ores of Park City,

Itah, were systematically tested with a view of making not only a marketable product of the zinc, but to render available smelting ores which cannot now be treated, owing to the heavy zinc penalty enacted.

The very interesting Blake-Morscher static process, gives a zinc product from the Park City ores containing about 57 per cent zine and worth \$22.50 per ton, f. o, b, Denver. There is a possibility of a Blake-Morscher magnetic plant being erected in Park City this summer in order to test the ores on a commercial

There are a number of good magneitc concentrators on the market, and those excellent fieldexploiting such processes can find an excellent fiel dn Park City

CENTURY ANNUAL MEETING.

Company Makes a Splendid Financial Exhibit-Manager's Report.

The annual meeting of the Century Gold Mining company, operating in the Park valley mining district, was held last night and resulted in the retention of the old board of directors for anyear, which organized by the selection of P. W. Madsen, president and manager; Thomas R. Cutler, vice president; R. W. Madsen, secretary and treasurer. The remaining members of the board consist of Elias A. Smith, J. B. Toronto, E. T. Studness and James

The financial statement submitted by Secretary and Treasurer R. W. Madsen showed the total receipts for the year from all sources to be \$112,035,30, which includes \$78,754.59 from the sale of gold bullion, \$12,476.64 for concentrates; \$5,-

502.21 for rich concentrates.

The total expenditures aggregated the sum of \$93,422.71; among the items being \$35,047.70 for mine and \$30,915.21 for mill labor. The total also includes the \$18,000 disbursed in dividends. The statement also showed that during the period of Dr. White's administration, from Feb. 1, 1898, to Jan. 31, 1902, the net production of the property was \$49,-341.47, and during Manager Madsen's regime, Feb. 1, 1992, to March 31, 1904, the company received to the sale of ore and bullion the sum of \$163,075.84, making the production of the property to

The balance of cash on hand March 31 was \$18,613.59.

Manager Madsen, in his report, stated that there is at the present time at least 80,000 tons of milling ore of an excellent grade blocked out and ready to be broken down. Concerning recent developments on the Lizzie vein he said:

"While drifting on the Lizzie vein in No. 2 shaft, a small stringer of quartz was noticed to run into the hanging wall. By exploring this small stringer a few feet a fine vein, five or six feet wide, was opened up. It has now been drifted on north for 130 feet. This vein is known as the 'spur' vein. Three upraises have been started and No. 2 is up 47 feet in very high grade ore, running from \$12.80 to \$110.40 in gold. This vein runs parallel with the Lizzle vein on its course north and can be followed for many hundreds of feet in the company's ground. Being a new vein, it means that a new mine has been opened up in the last 60 days of the cleanest high grade ore yet found in the Century

The April dividend of two cents a share was declared by the directors; the books to close on the 15th and payment to be on the 20th inst. The amount is

RETURNS FROM THE EAST.

Manager W. F. Snyder of the Western Exploration Co. at His Offices Again.

Willard F. Snyder, manager of the Western Exploration company, has returned from the east. He was in conference with the different members of his staff during the day in order to ac quaint himself with conditions at the various properties under his jurisdic-

D. A. Conley, the chief smelterman retained by the company to superintend the construction of a smelter at the Balaklalla mines in California, was on hand to discuss matters concerning that project, after having made a thorough inspection of the valley plants, as well as several of the best plants in the country, including that of the Ten-nessee Copper company, of which J. Park Channing is manager.

All the preliminary arrangements are said to be about completed and orders will be promulgated shortly to take steps for the construction of the new plant at the earliest possible moment. It will have capacity for the treatment of 1,100 tons per day.

GISBORN BRINGS SUIT.

Wants Deeds to Certain Mining Property Returned to Him.

Matthew T. Gisborn today filed suit in the district court against the Utah Commercial & Savings bank and J. E. Caine to compel defendants to deliver to him a deed to certain mining claims located in Tooele county and to restrain them from delivering the same to the Pittsburg & Utah Gold, Silver, Copper & Lead Mining company. It is alleged that plaintiff agreed to sell said claims to the mining company and placed the deed to the same in escrow in said bank to be delivered to the company upon its paying the final payment of \$14,000 on the purchas price on or before March 11, It is alleged that the company failed to make the payment and plain-tiff demanded the return of the deed to him but defendants refused to com-ply with the demand. Hence it is asked that they be compelled to deliver the deed to plaintiff.

May Try Chlorination.

No word has yet been received to prepare for work at the Mammoth mill, but the force at the local office is waiting expectantly, says the Tintic Miner. From Mammoth the report comes that, while working the ores now in the bins. the management may also make a trial of the chlornation process, which is projected for Star ores. That it will succeed on a certain class of Mammoth ores, there seems to be no doubt. The mine force is gradually being increased, until now close upon 100 men are drawing their per diem. Ole Sorensen, the present shift boss, is down for the ap-pointment of foreman. Mr. Landers, who is preparing to install the chlorin-ation process at the Star mine, is ex-pected to learn exactly what additions must be made to the mill to make a trial run.

Mill at De Lamar.

The mill at the Bamberger Delamar mine at De Lamar, Nev., is handling an average of 300 tons of ore daily and making a high extraction of values.

GIANT COPPER QUEEN MINING COMPANY.

A meeting of the company will be held in the Walker Bldg., Second South, room 225, L. T. Peer's office, on Monday, the 11th day of April, at 3 p. m. All stockholders are expected to be

C. E. DUGGER. Prest. and Manager.

NEVADA CHANGE.

Manager G. Pray Smith is About To be Succeeded by George E. Metz of New York.

LATTER NOW ON THE CROUND

Mill Will Soon be Enlarged-Immense Bodies of Milling Ore Have Been Developed in Mine.

From a gentleman who has been looking over several of the southern camps during the past few weeks it was learned today that a change is to be formally announced in the management of the Shawmut & Nevada Copper company, operating at Fay, Nevada, the same to take place within the next few days.

The new manager is to be Mr. George E. Metz, recently from New York, who is now on the ground checking over matters with the retiring manager, G. Pray Smith. The latter signified his intention of leaving Fay some time ago, having other matters on hand which need his undivided attention in the future.

Messrs. Metz and Smith are scheduled to arrive from the south in a few

Since Mr. Smith took hold of the Shawmut & Nevada, which is the old Horseshoe mine, formerly owned by A. McCune and associates, some wonderful changes have taken place. The mill was remodeled and changed in such a way that results of a most excellent nature have been obtained. The demonstration has been so satisfactory that plans are already being made for the doubling of the capacity of the mill which will be among the first moves of the new management. The development of the mine has progressed far beyond expectations, it is stated, and the quantity of ore blocked out amply justifies the enlargement of the mill

Minority Will Protest.

A meeting of the minority shareholders of the Star Consolidated Mining company has been called for next Saturday to protest against the proposi-tion to double the capitalization of the company, for the purpose of raising apital to build a chlorination mill. The meeting will be held in the office of T. Egan, in the Walker Bros.' bank build-

CONCENTRATES.

Two cars of Tonopah ores reached the local market this morning.

The executive officials of the Utah Copper company are at that Bingham property today.

Simon Bamberger departed for Call-fornia yesterday to look after important business matters.

James M. Kennelly, Jr., will join his father who is operating mining prop-erty near Callentes, Nevada.

C. M. Loeb, western manager of the American Metal company, with head. quarters at St. Louis, is in the city.

Metallurgist Yearsley of the Newport & Nevada mine at Fay, Nev., was an arrival from the south this morning. One hundred tons of ore from the

Woodside mine at Park City are being delivered to the sampler at Park City. Manager A. E. Hyde, Jr., of the An-nie Lauire Mining company, is up from Gold Mountain to meet P. L. Kimber-

ported late yesterday, were as follows: Crude ore and concentrates, \$50,400; base bullion, \$29,500, The Utah Copper company has rented

The ore and bullion settlements, re-

an additional office room in the McCor. nick building which is to be occupied by Cashier Hayes, Manager A. J. McMullen of the O. K.

Extension and Skylark copper properties in Beaver county, returned from the south this morning.

D. A. Conley, who is retained as the chief smeiter man for the Balakialia mine in Shasta county, Cal., will leave for the west in a few days.

Treasurer A. A. Ball of the Annie Laurie Mining company is up from Gold Mountain. The Annie Laurie dividend of \$12,500 will be checked out in

a few days. According to San Francisco advices, Judge Morrow of the circuit court has granted an appeal in the case of the Utah-Nevada Mining company against Joseph R. Delamar.

Manager S. L. Butler of the Summit Placer Mining company leaves for that corporation's properties at Soldier Summit this afternoon, accompanied by Superintendent T. P. Rigney.

W. A. Scott, traveling representative of the Engineering & Mining Journal, returned from a trip to Stateline and Delamar this morning, and expects to leave for a roundup of idaho camps

Former Assistant Secretary Fred Nightengale of the Salt Lake Stock & Mining Exchange is up from Calientes. where he has had charge of the com-missary department of one of the railroad construction gangs.

The big station pump ordered cently for the Comstock mine at Park City has arrived in that camp and will shorth be installed. This done, Superintendent Hickey will undertake to open up the vein on the 450 level at

The ledge in No. 5 tunnel of the Annie Laurie mine, recently encountered, has been penetrated to the distance of 3 feet, with no indication of the hanging wall. The opening of the vein on this level gives an additional depth of 467 feet, or about 1,300 feet on the dip from the surface.

Another lot of concentrates from the Utah Copper company's mill has reached the samplers, the controls showing 35 per cent copper and \$8 in gold. The management is greatly pleased with the results being achieved and it will not be long until the capa-city of the plant will be increased to

W. J. Burnham, who is superintend-W. J. Burnham, who is superintending the development of the Southern Pacific group in Sierra Madre district north of Ogden, is in the city again after several weeks' absence in camp. He is much elated over the results being obtained and is confident that in

a little time he will show up one

the best copper mines in the state. Henry Welland bonded on Monday to Messrs. Smith & Palmer of Sait Lake City two claims called the Start Up and Start Up No. 2 for \$2,000. Part was paid in cash and time given on the salance. These two claims are situated about two miles southeast of the West Point claims, and close to the Old Times, the property of F. Rice of Park City, and which has produced quite a large amount of \$20 gold ore. Assays taken from the Start Up claims Mon-day show a value of 36 ounces silver, 45 per cent lead and \$8.80 in gold per Messrs. Palmer & Smith put a force of men to work on the claims Tuesday and the development work so far has been most encouraging .- Ploche

MARKET UNDERTONE VERY FEVERISH.

Opening Was Dull and Hesitating, Stocks Dealt in Showing no Special Features,

BIC SALES OF UNION PACIFIC.

Was Lifted a Point Above its Low Figure-Pressure Against U. S. Steel

Caused Reaction.

New York, April 5 .- The opening stock market today was dull and the tone was hesitating. There were running sales of 6,500 shares of Union Pacific at 8814 and 881/2 compared with 89 last night, and this stock subsequently sold at 884. People's Gas ran off 14. There was a rise of % in Tennessee Coal, Otherwise the changes were small and mixed. Buying orders for some of the representative stocks created a better sentiment and prices were lifted quite substantially in a number of cases. Union Pacific was lifted a point above its low figure of the start and Pennsylvania, Southern Pacific, St. Paul, Rock Island and Tennessee Coal as much over yesterday's closing. The market reacted slightly following pressure against United States Steel preferred but steadied on a large accumulation of Southern Pacific. The undertone of the

market was feverish. Bonds were firm at noon, Trading interest was attracted to the local tractions by the simultaneous execution of buying orders in these stocks. The room element began bidding up prices of the group and Metropolitan Street Railroom element began bidding up prices of the group and Metropolitan Street Railway responded with a rise of 2%; Brooklyn Transit 1½ and Manhattan and Metropolitan Street 1. Railroad stocks meanwhile though partly neglected, held well. Atchison preferred, Kansas & Texas preferred, Amalgamated and Colorado Fuel rose from 1 to 1½. Lackawanna lost 2. Little business was done in the merger stocks on the curb today. Northern Pacific sold down a fraction, but regained the greater part of its in the first hour. There were no actual transactions in the stubs or in Great Northern preferred, Quotations for these stocks differed little from yesterday's close.

About 2,990 sares of Northern Securities were traded in during the morning session. The top prices was 98½, but the prevailing figures was 98½ to 98½. Nothing was done in the other merger stocks except teh occasional sale of an odd lot.

Amalgamated Copper was pushed up to 50½ and Anaconda gained 2½. United States Steel preferred, which was under rather continuous pressure earlier, suddenly moved up 1 over yesterday's close and Sugar and St. Louis South western preferred gained about a point. Colorado Fuel increased its rise to 2 points and Realty preferred touched 54½, a gain of 3½. Realizing went on in the railroads and tractions under cover of this strength, Union Pacific and Metropolitan Street Railway falling back a point, and some other large fractions. Snuff improved 5 points on one transaction.
